

What is MVHacks?

MVHacks is a 24-hour high school hackathon run by Mountain View High School students at 42 on June 10th-11th, 2017. A hackathon is an organized event in which groups of STEM (Science, Technology, Engineering and Mathematics) students gather to design solutions to problems through programming. Teams most commonly work on projects designed to solve social issues, to pilot business ideas, or simply to tinker with new technologies. We want to convince students that anyone can code, and excite students to pursue STEM careers. They can come to our hackathon to learn to code, to network with like-minded people, explore new technologies, and most of all, have fun.

What are the logistics of MVHacks?

Around 300 students will attend the event at the 42 Silicon Valley (6600 Dumbarton Circle, Fremont, CA) from the morning of June 10th to noon June 11th. The event will last around 26-27 hours out of which 24 hours will be for hacking. It will be an all-inclusive event for all high school students to attend free of charge.

Why sponsor MVHacks?

As a high school hackathon, there will be many first time coders at MVHacks. By sponsoring MVHacks, you can make a great first time impression on new programmers and teach them to use your technologies - APIs, hardware, software, etc. Talented high school programmers from Silicon Valley's top schools will also be attending, presenting a valuable opportunity for internship and job recruitment.

What will your money be used for?

With your contribution, we will buy food, materials, prizes, swag, and more to help make this event an awesome experience.

Sponsorship Tiers

	Bronze \$750	Silver \$2,500	Gold \$5,000	Partner \$7,500+
